

Don't just find workers. Find better staff, faster—and grow your business.

Your business depends on productive, reliable workers. Why is it so hard to find them? Now there's a hiring tool custom-designed for independent businesses, with features you won't find anywhere else—for less money than you might be paying now.

“Hiring local is good business, and that’s why Kauzu.Biz is such a great business tool.”

—Lisa Wagner, Executive Director, Business Partners—The Chamber for Uptown

Why Kauzu.Biz?

Hire local

Local workers save you money, with better on-time performance and lower turnover—at least \$3500 for every employee you don't have to replace. Kauzu.Biz connects to two free mobile jobseeker applications that pinpoint jobs by location, so local jobseekers find your listings first.

Easily edit, save and re-post listings

Why rewrite the same listing again and again? Kauzu.Biz lets you edit, update, retrieve, repost, and save multiple job descriptions—and do it all from any computer, tablet or smart phone.

Quickly filter, sort and select applications

Other job sites waste your time screening every applicant one-by-one. Kauzu.Biz filters applicants by your settings, so the ones that best fit your preferences come up first. The staff you need, at twice the speed!

Keep jobseekers updated

No one likes feeling ignored. Kauzu.Biz sends everyone who applies to your listings status reports, to make their job search a better experience. Why? Because jobseekers are customers, too.

Turn jobseekers into customers

Advanced analytics show you where, when and how many jobseekers have viewed your listings—not just who applied. That's information you can convert into opportunities to build your business.

A more advanced, more cost-effective hiring tool lets you hire better, cut turnover costs and grow revenues!

Kauzu.Biz makes staffing more effective and more productive, targeting jobseekers through the communication tools they use most. You'll cut turnover costs by hiring local, save time, and discover tools that can build customer traffic. **And you'll do it for about the same cost as a bare-bones posting on Craigslist.**
